Facestock		Facestock physical properties				
2 Mil White Print-Treated polyester is a pigmented white semi-glossy film facestock featuring excellent tear strength, heat resistance, dimensional stability, opacity, and chemical resistance. The print treatment is designed to enhance printability with a variety of printing processes.			Imperial Value	Units		Metric Value
	Caliper: ASTM D1000		0.0020	inches		50.80
	Tensile: ASTM D882	MD	21,000	psi		1,476
		CD	31,000	psi		2,179

Adhesive		Adhesive physical properties					
S-333 An excellent general purpose industrial grade clear permanent acrylic adhesive. Features high initial tack to most high and medium surface energy substrates. High shear strength for low ooze characteristics.			Imperial Value	Units		Metric Value	Units
	Type:		Emulsion Acrylic				
	Caliper: ASTM D1000		0.0008	inches		20.32	micron

Liner		Liner physical properties				
50#SCK is a bleached, super-calendered paper stock with very good diecutting and matrix stripping properties. Supplied with an Anti Block Coating ("ABC") on the backside of the liner to control adhesive and label transfer to the backside of the liner in finished, wound rolls. This liner should not be used in fanfolded label applications and is not recommended for back printability.			Imperial Value	Units		Metric Value

Features and Benefits

- Opaque white facestock with very good hiding power and physical strength.
- Surface print treatment that accepts most flexographic, letterpress, and rotary screen inks.
- Excellent chemical resistance and good outdoor durability

Applications and Uses

This product is suitable for a variety of durable labeling applications such as:

- Product identification labels
- Rating plates
- Work in process (WIP) labels
- Property identification or asset tags
- Durable goods labeling
- Recognized for UL969 component labels. This product is UL969 Recognized and CSA Accepted for indoor and outdoor applications. For specific recognition or acceptance details, consult UL file MH17205 and CSA file 97198

Printing and Converting

The print treated surface is designed for printing by most solvent, UV cured, and water-based flexographic inks, UV cured letterpress, and rotary screen inks. Specially formulated inks are normally not necessary, however, testing is recommended prior to final ink selection. This product can be die cut and stripped at high speeds on most web-fed presses. Sample labels in a variety of shapes have been successfully dispensed and applied with standard labeling systems.

RoHS/Regulation 2002/95/EU

The substances listed in article 4 lid 1 of 2002/95/EU (RoHS) are not intentionally used in this product. The concentration limits of these substances will not exceed the set maximum concentration limits as provided in the proposed amendment for 2002/95/EU.

Optimal Storage Conditions

Unless otherwise specified in this document, ideally store at 72F and 50% RH

Note:

The technical data presented is from tests we believe to be reliable but should be considered representative or typical only and should not be used for specifications purposes. This product should be tested thoroughly under end-use conditions to ensure it meets the requirements of the specific application.

Environmental Performance : Chemical Resistance test results

The performance results are based on 4 hour immersions at room temperature unless otherwise noted (gasoline is 1 hour). Samples were applied to stainless steel panels and conditioned for 24 hours before immersion and evaluated immediately upon removal. Adhesion measured at 180° peel.
